To Whom It May Concern

I have finished my review of the dissertation entitled *"As Asymptotic theory of regressions with asymptotically collinear regressors,"* by Darkenbayeva Gulsim Spandiyarovna, which has been submitted in fulfillment of the requirements for the degree of Doctor of Philosophy (PhD) in Mathematics.

This dissertation makes important contributions to our understanding of the asymptotic behavior of linear and quadratic forms. The Central Limit Theorem obtained may prove useful in a variety of settings in Statistics and Econometrics.

I approve this dissertation without hesitation.

Yours sincerely,

Carlos Brunet Martins-Filho
Professor of Economics
Professor of Applied Mathematics (affiliate)
