Test tasks on chemical technology. Educational manual, Almaty, 2020.

The manual contains test tasks for the main sections of the course “General Chemical Technology” for the Specialty “5B072000 - Chemical Technology of Inorganic Substances”. The educational manual is intended for the organization of independent work of students. The educational manual contains a very detailed glossary, questions for self-checking to each chapter. It can be useful for bachelors, masters of chemical and technological specialties of higher educational institutions and for engineering and technical workers in the chemical and allied industries.
