

# Multilingualism is the key to the future

Being a civilized country, it should not be forgotten about the spiritual development of the state, whether it be a nation or a nation. This is a guarantee of a nation that is not forgotten. The President reminds us that national values are important for the future and future of the country. The article "The Orientation for the Future: Spiritual Renaissance" is a prerequisite for the courageous initiatives that we are confronting today and are firmly convinced of tomorrow. This program focuses on the future, focusing on our past, focusing on the creation of a unique intellectual society in the future based on national consciousness, without forgetting spiritual values. The source of spiritual riches is language. Higher educational institutions of our country are important in the development of language education, as well as preparing the younger generation to a spiritually rich, competitive and qualified specialist. To date, the Kazakh National University named after Al-Farabi has developed a systematic approach to the development of linguistic education and its implementation in line with world standards. One clear example of this is the fact that all faculties of the Al-Farabi Kazakh National University are actively involved in the study of foreign languages, Taking into consideration the task of Nazarbayev in promoting the trilingualism of the languages, it is important to train highly qualified specialists with three languages. There are 12 language departments at Al-Farabi Kazakh National University. Professors are distinguished by their high professionalism and a unique educational institution that trains more than 10 languages professionals. This is based on the quality of language education and the competitiveness of the Al-Farabi Kazakh National University. Al-Farabi Kazakh National University named after al-Farabi has a long-term experience and has highly qualified scientific and pedagogical staff. It should also be noted that university teachers published new generation book collections. These textbooks are widely used in educational institutions throughout the country. Students are studying in some natural sciences and technical subjects in English. There is also an opportunity to learn a foreign language independently and get a special project education abroad. Teachers also constantly improve their qualifications. In this connection, the exchange of experience with the teachers of educational institutions abroad. At the university, there is a growing number of students from foreign countries. All this indicates that the university has a systematic approach to foreign language learning. Nevertheless, the state language has also been ignored. In order to strengthen the role of the state language, "Mother tongue-tongue", "Language teaching", "Mother tongue-ardagym" etc. university events are organized and every year the students' interest is growing. Frequent events are organized to promote the state language among representatives of other nationalities. For example, "State Language: Today and Future", "Slang of the State Language", "Zhyr Agairiri", "Days of the People of Kazakhstan" and others. Foreign students and other nationalities are encouraged to learn the Kazakh language. In the case of fluency in the Kazakh language, special certificates are issued. International standards of language training have been launched. These measures are aimed at increasing the communicative role of the Kazakh language. Al-Farabi Kazakh National University is a leading educational institution of the country, performing well-qualified work in the field of linguistic education and learning and the role of the state language. In order not to be forgotten by your own child, your mother tongue should be prestigious, and foreign language knowledge is a must-have in the way of civilization development.
