In my short presentation, I would like to provide “5 effective ways to learn English. At one time, I myself used many of these methods, and I can easily say that they even helped me a lot, and I hope that they will help many other students who find it difficult to learn English.

Today, it is almost impossible to make a successful career without knowledge of the English language. However, language is important not only in professional activities. It allows us to feel confident while traveling, expands the boundaries of knowledge of the world, we better understand the cultural and national characteristics of other peoples. Now in most schools, English lessons are included in the compulsory curriculum, starting from the second grade, but by the end of school, few of the children can boast of fluency.
