### **JOINT DEVELOPMENT OF THE CHEMICAL INDUSTRY**

In accordance with the tasks set by the Head of State to build a new structure of the economy based on a competitive non-resource sector and the production of goods with high added value, Al-Farabi KazNU contributes to the diversification of the country's economy by building science-intensive industries. One of the areas of innovative development of the economy is the chemical industry, which accounts for about 0.24% in the formation of the country's GDP, which indicates a lack of demand for Kazakhstani products in the world and reflects the weak competitiveness of domestic production.
