### **PROTECTS STUCK FROM BACTERIAL DISEASE**

In recent years, the production of sturgeon in aquaculture has grown significantly due to the high demand for caviar on the world market. Sturgeon farming in aquaculture is one of the most important measures aimed at reducing the population and restoring the life cycle of sturgeon. However, the rapid development of aquaculture leads to an increase in diseases caused by bacterial infections, which in turn can lead to high mortality of sturgeon in aquaculture and catastrophic economic losses.
